Maintenance and Troubleshooting

Unqualified Working Environment

- Avoid shooting objects such as sunlight or light, etc.

Troubleshooting

- Unable to access through the browser
- 1) Using PC to access the network to test that the network access can work properly to eliminate the network fault caused by cable and PC virus until the PC and device can ping each other.
 - 2) Disconnect the network, connect controller with PC separately and reset the IP address of PC if necessary.
 - 3) Check that the IP address, subnet mask and gateway settings is correct.
- Forget the IP address

The default IP address is: 192.168.100.81
